Summary

A highly motivated, driven developer with skills in Python, Django, JavaScript, Ruby, PostgreSQL, MongoDB and Node.js

Writing clean, good and scalable code is my passion.

Education

B.E Civil Engineering   *Sep 2012*

Birla Institute of Technology,Mesra

Career History

Software Engineer, *Changer, Pune*   *Feb 2013 - Present*

- Full time developer building Socialschools (http://socialschools.nl) which is a safe and secure Social Network for Schools.
- Implemented a scalable and user friendly multi tenant system built on top of Django.
- These days I write a lot of Django code along with frontend work on backbone layers. I also work closely with the Mobile team (iOS and Android) to ensure that they get proper APIs and documentation support to get their job done.
- I also help my team write good maintainable code by doing code reviews and following good practice like Git, documentation and tooling.
- I also have a good experience building CMS based websites for clients and am very comfortable meeting tight deadlines of client projects though I love working on products more.
- Problem solving and coming up with best possible solution in time is my strength and I work very hard to get better at my skillset.

Consultant, *gadgetizor.com and digitizor.com*   *Summer 2011 - Jan 2013*

- Worked on the design and scaling of wordpress based high traffic sites mentioned above.

Chrome Extension Developer, *Worked on a E-Commerce based Chrome Extension and extension listed on Coderwall.com http://coderwall.com/api*   *Sep 2012-Nov 2012*

- Developed a full stack e-commerce based chrome Extension.

Skills

Programming: Python, Django, HTML5/CSS3, JavaScript, AngularJS, LaTeX, BackBoneJS, PostgreSQL, Node.js, Git
